

HOW TO USE ...

STRUCTURE STYLE

23183 (18cm), 23233 (23cm), 23253 (25cm)

1

Preparation

Prepare the wall to be plastered. Our STRUCTURE STYLE can perfectly combined with our POLO extension poles.

2

Mix

Mix the processing mass evenly.

3

Working with the roller

The more the roller has absorbed from the material to be applied, the better the result will be. This ensures the special structure.

4

Apply

Now you can plaster the wall. Simple and even. Also ideal for decorating.

5

Remove

The material can then be easily removed with the help of a spatula.

6

It couldn't be easier!

Save time with the quick application. Eh'klar!
